DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The disclosure is objected to because of the following informalities:
Paragraph [0001] should be updated to reflect the patent status of application 10/360,945.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5, 8, 12 and 14 of U.S. Patent No. 5,572,851.

Although the conflicting claims are not identical, they are not patentably distinct from each other because;

The plant package as produced by the instant independent **claim-1**, is broadly encompassed by the plant packaging method of the conflicting independent claim; wherein, the conflicting claim recites a perforated flexible sleeve having a bonding material, a lower decorative portion and upper detachable portion, which encompasses the instant initially flattened tubular sleeve having a tapered base portion, decorative skirt portion and closed lower end, secured about a pot with a bonding material.

The base portion limitation as cited in the **instant claim-2** is also recited in the conflicting independent claim,
the skirt portion edge as cited in the instant **claim-3** is also encompassed by the conflicting independent claim,
the sleeve construction cited in the instant **claim-4** is recited in the conflicting claim-4,
the upper detachable portion as cited in the instant **claim-7** and adaptation as cited in instant **claim-5** are encompassed by the conflicting claim-8,
and the tapered base portion as cited in the instant **claim-6** is a restatement of the tapered base portion cited in the instant independent claim.
